

## The add-on solution for **your palletizing tasks**

- Smart palletizing system for different tray sizes
- The ideal solution for injection moulding in combination with our Z.SIROC
- Easy to integrate in a ZAHORANSKY automation / packaging solution

SYSTEMS TECHNOLOGY

The modular palletizing solution  
for your application

- Modular component with safety guard housing
- Everything from one source
- Ergonomic loading and unloading position as a standalone solution
- Specially developed universal Tray Unloader and Tray Loader solutions
- Primarily used for cosmetics, consumer goods, plastics, pharmaceutical industry and medical technology, etc.

### Benefits

- Quick tray changeover
- Compact footprint
- Extended autonomous time with optional buffer modules
- Efficient without the need of servo techniques

### Facts

- Tray sizes either 400 x 600 mm or 400 x 300 mm
- Further sizes available on request
- Stack height up to 600 mm
- Tray changeover times < 4 sec

Example:  
Z.LODOS integrated into Z.SIROC

### Greater Efficiency through Integrated Automation

As far as improving production efficiency in injection molding processes is concerned, integrating the upstream and downstream working steps cannot be avoided. This is precisely where ZAHORANSKY Systems Technology's strength lies. Our specialists develop innovative concepts, modules and solutions for the integrated automation of injection molding production processes with dedication and tenacity – specifically for the manufacture of plastic products in the consumer, medical technology and cosmetic sectors.

ZAHORANSKY – PERFECTLY DIFFERENT
